Summary

Engineering graduate admitted to ISC Paris's fast-track MSc in International Marketing, starting February 2027. Experience translating client needs into digital solutions, applying generative AI and improving operational processes. Seeking a 12-month apprenticeship in client engagement and digital projects, combining analytical skills with an interest in personalised customer experiences in luxury.

PROFESSIONAL EXPERIENCE

Rivière Yuan EdTech Lyon, France
Full-Stack Developer and Generative AI Intern June 2025 – October 2025
• Translated client needs into digital features using React, TypeScript and Node.js.
• Built a RAG-based article analysis agent, reducing manual review time by 60%.
• Created the product backlog and documented client meetings to track requirements and decisions.
• Built a shared-link enrolment workflow, reducing administrative work by 85%.
• Implemented cursor-based pagination, reducing data transferred per request by 70%.

Art & Science Node Berlin, Germany
Erasmus Technical Intern, Web Development July 2024 – September 2024
• Designed and launched a European project website in eight weeks using HTML, CSS, JavaScript and WordPress.
• Integrated 2 interactive Three.js models and improved loading performance.
• Mentored two junior interns in WordPress and web development fundamentals.
