

SUPIPI AMARAJEEVA

Junior Software Engineer

✉ supipiamarajeeva@gmail.com ☎ +33 7 49 14 96 78 📍 Paris, France 🔗 [LinkedIn](#) 🐙 [GitHub](#)

EDUCATION

ESIGELEC Engineering Degree
Digital Service Engineering
Rouen, France • 2022 - 2025

Belarusian National Technical University
Engineering Preparatory Studies
Minsk, Belarus • 2020 - 2022

CORE SKILLS

Software Development

Python, JavaScript, TypeScript, Java, React, HTML, CSS, Node.js, Express, REST APIs

Data & Artificial Intelligence

SQL, PostgreSQL, Supabase, generative AI, LLMs, RAG, NLP, data analysis

Testing & Deployment

Vitest, Playwright, pytest, GitHub Actions, Docker, Vercel, CI/CD

Tools & Methods

Git, GitHub, Postman, Agile/Scrum, Trello

Professional Skills

Cross-functional collaboration, problem-solving, communication, adaptability, attention to detail

CERTIFICATES & AWARDS

Med'ing Hackathon, 3rd Place
September 2024

- Developed a speech-to-text system and a Docker-containerized Python inference API.
- Achieved 97.9% precision, 97.5% recall, and a 97.4% F1 score on controlled phonetic datasets.

LANGUAGES

English C1
French B2 (TCF 435/699)

Summary

Software Engineering graduate with international experience in full-stack development, data, and generative AI. Skilled in Python, React, TypeScript, Node.js, and PostgreSQL, I am seeking a junior software engineering role where I can build reliable, user-focused products and grow within a collaborative team.

PROFESSIONAL EXPERIENCE

Rivière Yuan EdTech Lyon, France

Full-Stack Developer and Generative AI Intern
June 2025 to October 2025

- Developed and deployed data-driven features using React, TypeScript, Node.js, REST APIs and PostgreSQL.
- Migrated several years of historical data from WordPress to Supabase using Python, resolving duplicate records, incomplete data and outdated links.
- Optimised PostgreSQL queries and implemented cursor-based pagination, reducing transferred data by approximately 70%.
- Automated enrolment processes, reducing selected administrative tasks by up to 85%.
- Designed a RAG-based document analysis workflow that reduced manual review time by approximately 60%.

Art & Science Node Berlin, Germany

Erasmus Technical Intern, Web Development July 2024 to Sept2024

- Designed and launched a European project website in eight weeks using HTML, CSS, JavaScript and WordPress.
- Integrated two interactive Three.js models and improved loading performance through media optimisation and lazy loading.
- Mentored two junior interns in WordPress and web development fundamentals.

PROJECT

Joblyst, AI-Powered Job Application Analyser August 2026

- Developed a full-stack application that analyses compatibility between CVs and job descriptions, generating match scores, missing skills and tailored recommendations through REST APIs.
- Implemented automated frontend and backend testing with Vitest and pytest, supported by continuous integration through GitHub Actions.

Technologies: React, TypeScript, Python, FastAPI, Pydantic, Vitest, pytest, GitHub Actions
